## The State of the Arab Agricultural Sector :

The Arab countries enjoy abundant agricultural potential with an estimated arable land of 278 Million hectares. In spite of this, the actual cultivated land in 2016 was around 71 Million hectares. The agricultural labour force is estimated at around 28.2 Million people and the agricultural sector contributes around 6.07% of the Gross Domestic Product.

## The Arab Food Gap :

The Arab Food Gap in the year 2016 was approximately 32.81 billion USD and focused on certain goods of which the most important are seeds, which solely contributes around 47.56% of the food gap. Meat contributes approximately 18.61%, vegetable oils 8.82%, milk products 7.16%, sugar 9.22% and others 8.63%.

wards developing the agricultural sector through encouraging investment in agricultural production by granting benefits and concessions and creating an appropriate investment climate as well as supporting infrastructures in agricultural areas.

## Establishment:

The Arab Authority for Agricultural Investment and Development (AAAID) is an independent multilateral AAAID's Establishment Agreement and Articles of Association were announced in March 1977.

## Shareholders :

 AAAID has 21 Arab Members States

## Capital :

 AAAID Authorized Capital is KD 336 Million (USD 1.114 Billion), and its paid up capital is KD 204 Million (USD 676 Million) as of December 31<sup>st</sup> 2017.

## Fiscal Financial year:

 AAAID's Fiscal Financial year starts on 1<sup>st</sup> of January and ends on 31<sup>st</sup> December.

Khartoum, the Republic of Sudan  
Headquarters

Dubai, the United Arab Emirates  
5EJURQD0E3H

Within the framework of its strategic guidelines designed to enhance investment opportunities into:

- Investment opportunities related to the full utilization of available their Working Capital.
- Investment Opportunities related to the addition of new production.
- Investment opportunities related to complete rehabilitation to restart or develop the operations of stagnant companies.

## Why invest with AAAID ?

- Throughout its 40-year history, AAAID has acquired a unique cultural processing.
- concessions and political coverage granted to AAAID in Arab member states as stated in its establishment agreement.
- AAAID's Board of Shareholders are the Arab Ministers of Finance to overcome obstacles that it may face.
- rate governance in its companies.

## Investment Criteria :

1. The Project should be aligned with AAAID's vision and objectives in the production of basic food products that contribute to the reinforcing of Arab Food Security.
2. The Project must be integrated between Agricultural Production and Agricultural Processing in one member state or between various member states.
3. Projects under study should apply technology whenever possible.
- 4.
- 5.
6. The Total Investment Cost should be not less than USD 20 Million.
7. AAAID may participate in the equity capital of the project within a range of 25% to 49% of the Equity of the Project.
8. The Project's Internal Rate of Return (IRR) should not be less than 12.5% with consideration of the risk and return levels in the member state.
9. Equity contribution should be between 40% and 60% of the project's total investment cost.
10. The Project's Feasibility Study should include an appropriate exit strategy.

**Establishment :**

1975

**Location :**

Wahat, Khartoum, Sudan

**Shareholders :**

Paid up capital is SDG .561 million. Shareholders are:

5.59%	30.64%	35.33%
AAAI	Kuwaiti Investment authority	Government of Sudan

# Arab Sudanese Vegetable Oil Company

## Establishment :

1982

## Location :

[REDACTED]

## Shareholders :

the Paid up capital is SDG 168 million. Shareholders are:

88%

AAAID

12%

Government of Sudan

### Main Activities:

- Production of vegetable oils, Cake, soap and glycerin

### Production Capacity :

Oil seeds  
crushing 75,000  
tons/year capacity.

SEBADI  
18,000  
tons/year capacity.

Packaging  
20 Thousand  
tons / year capacity.  
**Two packaging lines**

Soap Production  
8000 tons  
of soap/year.  
and  
Raw glycerin 600 tons  
year capacity

### Company Restructuring plan :

A study was prepared for the restructuring and rehabilitation of the company, which included a plan to exploit the full capacity of the company.

### Investment Opportunities:

- Provide operational capital for full utilization of the project capacities.
- Introduce solvent extraction techniques.
- To achieve integration through the establishment of an agricultural project or contract farming for raw material supply.

SDG 17: Partnerships for Sustainable Development

**Establishment :**

1982

**Location :**

White Nile State, Sudan

**Shareholders :**

Paid up capital is SDG 39.9 million and shareholders are:

51%

49%

AAAID

Government of Sudan

**Main Activities:**

- Cultivation and production of main crops in the rain fed sector (cotton, sesame, sorghum, millet, chickpea, lentils, beans, peas, groundnuts, sunflower, soybean, wheat, maize, rice, sugarcane, etc.)

**Production Capacity :**

- Land with a total area of 219 Thousand feddans.
- Cultivable land with a total area of about 160 Thousand feddans.
- 100% of the land is irrigated.
- The company has a total production capacity of 1.2 million metric tons per year.

**Re-structuring Plan:**

- Investment and operating cost estimated at USD 25.4 Million over 5 years period.

**Financial Indicators:**

- IRR: 11%
- The company is currently in a process of re-structuring and is expected to be profitable by the end of 2023.

**Investment Opportunities:**

**To participate in the following :**

- Shareholding in the company.
- Diversifying the company's activity by introducing new activities such as calves fattening and fodder production.
- Contractual partnerships for strategic crop cultivation.
- Engage in contractual partnerships for strategic crop cultivation.

## Arab Sudanese Seeds Company

### Location :

6 agricultural stations across Sudan.

### Shareholders :

Paid up capital is USD 12 Million and shareholders are:

34.93%

51.55%

13.52%

AAAIID

Government of Sudan

Other Institutions

### Main Activities:

- Production of improved seeds for various crops including sorghum, millet, and wheat.

### Production Capacity :

- Production of approximately 14,000 tons/year of improved seeds.

### Future Investment plan:

- Increase the cultivated areas and expansion of contract farming which requires increasing the operating capital of the company.

### Investment Opportunities:

- The search for shareholders to increase the capital of the company to modernize its components of the company and the introduction of modern technologies.
- Investment in producing hybrid seeds for the targeted crop varieties, expanding its activities and exporting its products to the markets of neighboring countries.

## Al Mutamayiza for Vegetables and Crops Production

### Location :

About 10km to the South-East of Khartoum.

### Shareholders :

Paid-up capital is SDG .012 Million and shareholders are:

42.50%

AAID

20.00%

Government of Sudan

12.50%

Government of Saudi Arabia

12.50%

Government of Kuwait

12.50%

Government of Iraq

### Main Activities:

- Processing, packaging and marketing of vegetables and fruits collected from contract farmers.

### Production Capacity :

- Refrigerated storage: 2,500 tons.
- Three lines of processing, grading and packaging.
- Seven irrigation sprinklers, 16 greenhouse and agricultural machineries and equipment.

### Future Business Plan:

- The total project investment cost is estimated at SDG 57 Million.

### Financial Indicators:

- IRR : 21%
- Payback period : 2 years and 6 months

### Required Finance:

- [Illegible text]

### Investment Opportunities:

- To participate in the capital increase.
- To engage in operational partnership to implement the re-operation plan.
- Provision of the required loan to carry out the re-operation plan.

## Arab Company for Agriculture Production and Processing

### Location :

Gazira State

### Shareholders :

Paid Up capital is about SDG 72,000 and shareholders are:

### Main Activities:

- Production of milk, starch and glucose.

### Production Capacity :

**Wet milling technology for the production of starch, glucose, feed and maize, with a production capacity of 150 tons/day through three lines:**

1. Starch production line of 33 tons.
2. Glucose production line of 66 tons.
3. ~~SOLP DOR HIG SURG XEW RROO QEHUMD XWBC RQND III~~
4. Agricultural land area of 5500 acres for the cultivation of green fodder.
5. Five cowsheds for dairy cows and fattening of calves for about 5000 cows.
6. Cooling unit for milk and refrigerated transportation.
7. Stores for concentrated feed (900 tons).
8. Tanks for keeping molasses (150 tons).
9. Dry feed stores with a capacity of 500 tons.
10. Dairy factory: 80 tons / day.

### Future investment Plan:

Rehabilitation of Starch and Glucose Plant at an average cost of about EUR 9 Million and re-operating the plant at an estimated cost of about USD11 million, estimated by a specialized expert house.

### Investment Opportunities:

**Participating or contributing to the provision of funding for the following:**

- Rehabilitation, modernization and operation of the plant and the introduction of modern packing and packaging systems.
- Establishment of a project to cultivate 20,000 feddans to provide maize.

## Arab Company for Poultry Production and Processing

**Establishment :**  
2004

**Location :**  
Khartoum State –Taiba Hasanab

**Shareholders :**  
Paid up capital is about SDG 19.84 Million and shareholders are:

AAAIID

Republic of  
sudan

kingdom of  
saudi Arabia

state of kwait

Republic of  
Iraq

### Main Activities:

- Poultry meat and table eggs

### Production Capacity :

1. Maternal farms (12) a barn of 50 thousand chicks produces about 4.5 Million egg hatching annually.
2. Poultry farming with a production capacity of 4.4 Million chicks.
3. The layers section with production capacity of 15 Million table eggs / year.
4. The hatchery with 12 incubators and 4 hatches, with capacity of 5 million-chick per year
5. Slaughterhouse which contains a freezing room and refrigerated storage stores with a capacity of 3000 birds per hour.
6. The milling factory, which has a production capacity of 10 tons / hour, consists of 3 silos with a storage capacity of 6 thousand tons in addition to external warehouses and administrative building.

### Future investment Plan:

A study has been prepared aiming to raise production to about 7.5 thousand tons by the end of 2020 and about 10 Thousand tons in the year 2026 in addition to doubling the production of table eggs to about 30 Million eggs and poultry meat processing. With investment cost estimated at USD 21.8 million.

### Financial indicators of the restructuring study:

- IRR: 26%
- Equity yearly growth: 44%
- 

### Investments Opportunities:

-   
duction capacity through modernization of the system and the establishment of parents and broilers pens.

## Elbagair Red Meat

### Location :

Al Bagair

### Shareholders :

Equity capital is USD 38.59 Million and shareholders are.

### Main Activities:

- Establishment of an integrated project for the fattening, production, butchery, marketing and exporting of red meat (live animals, beef cuts and meat products).

### Production Capacity :

- 500,000 sheep for export market.
- Fattening and preparation of 150,000 sheep for the local and export market.
- Fattening and preparation of 45,000 cows for the local and export market.
- 15,000 cows for meat processing.

### The Project Feasibility Study:

- Investment cost estimated at USD 119 Million

#### Financial Indicators:

IRR: 32%

#### Required Finance:

Equity of about USD 38.59 Million and loans of US \$ 80.3 million

### Investment Opportunities:

- To participate in the capital of the project to establish all its components.
- Loans for the project.

## Arab Poultry and Cattle Equipment Company

### Establishment :

1992

### Location :

Fujairah United Arab Emirates.

### Shareholders :

Paid up capital is UAE dirhams 50 Million and shareholders are:

### Main Activities:

- Manufacturing of poultry and cattle equipment, especially ground feeding system products.

### Investment Opportunities:

#### To participate in the following :

- Rehabilitation of the company.
- Expansion of air-conditioning activities.

## The Arabian Shrimp Company- Kingdom of Saudi Arabia

### Establishment :

2005

### Location :

City of Jazan

### Shareholders :

Paid up capital is SAR 33.77 Million and shareholders are:

AAAIID

Aqua Farms Corporation

Aquad For Partnership

Partnership

### Main Activities:

- phase implemented in an area of 700 hectares.

### Production Capacity :

- Production of about 2.9 thousand tons of shrimp per year.

### Re-operational Plan :

- The cost of re-operation plan estimated at SR 41 Million.

### Financial Indicators:

IRR : 42.5%.

### Required Finance:

About SR 41 Million for re-operation.

### Investment Opportunities:

- Contribute to completing the other stages of the project.

Arab Fisheries Company

**Establishment :**

1979 and began its production activity in 1984.

**Location :**

Jeddah

**Shareholders :**

Paid up capital is SAR 59.5 Million and shareholders are:

**Main Activities:**

- [REDACTED]

**Production Capacity :**

- [REDACTED]

**Re-operational Plan :**

- A French expert house was commissioned to prepare a study of the company's conditions and to develop an operational plan for it.

**Investment Cost:** 28.4 SAR Million

**Financial Indicators:**

- [REDACTED]
- IRR: 47%
- Payback period : 3 years
- The investment cost is SAR 28.4 Million

**Required Finance:**

- [REDACTED]

**Investment Opportunities:**

- Participate in or contribute to the existing activity to exploit the full production capacity of the Khairat [REDACTED] Arab countries.
- Contribution to the new projects expected in Yemen, Mauritania and Egypt.

## Arab Cooperative Company

### Establishment :

2009, production started 2013.

### Location :

Asser area

### Shareholders :

Paid up capital is SAR 300 Million and shareholders are:

### Main Activities:

- Production of poultry meat, fodder and chicks.

### Production Capacity :

- Slaughterhouse: 60 Million birds / year.
- Hatching: 40 Million hatching eggs.
- Waste treatment unit: 45 tons / day.

### Future Investment Plan:

- Establishment of maternal farms, barns for the production of broilers and the expansion of hatchery with a capacity of 80 Million eggs per year. Investments cost estimated at SR 40 million.

### Investment Opportunities:

- Providing loans to complete the project components.

**Establishment :**

1985, production began in 1987 and AAAID joined as a shareholder in 1993.

**Location :**

Doha area on Kuwait Bay, about 30 km from Kuwait City.

**Shareholders :**

Paid up capital is about Kuwaiti Dinars 0.5 Million and shareholders are

AAAID

Al-Soor Financial  
Consultancy Co.

Heirs of Abdul  
Aziz al-Marzouq

Other private  
investors

**Main Activities:**

- **Cooperative Associations.**

**Production Capacity :**

- 400 tonnes per annum.

**Investment Opportunities:**

- **Investment opportunities**
- **Investment opportunities**

## Poultry Meat Production Project

### Location :

Located in shagaya 100 km from the Capital.

### Shareholders :

Paid up capital is about KWD 8.6 Million and shareholders are:

### Main Activities:

- Production of poultry meat.

### Production Capacity :

- Broilers farms: 7 farms (42 barns) with a capacity of 6.4 Million birds / year.
- Milling factory: 10 tons / hour.
- Slaughterhouse: 3000 birds / hour.
- Hatching Lab: 9 Million egg hatchery.

### Feasibility Study:

- Investment cost estimated at KWD 12.4 Million (equivalent to USD 40.9 Million)
- Return on investment is 11.6% and pay pack period is 9 years.

### Investment Opportunities:

- To contribute in the capital of the project.

## Omani-Euro Food Industries Company

### Establishment :

1996

### Location :

Sohar – West Muscat - Sultanate of Oman.

### Shareholders :

Authorized capital is RO 2 Million and Shareholders are

### Main Activities:

- Production and marketing baby foods as well as packaging of others' baby food products especially for Heinz Company.

### Production Capacity :

- Cereals production: 2,750 ton/year
- Biscuits production: 2,200 ton/year

### Investment Opportunities:

- AAAID's shares in the company are available for sale.

The Arabian Company for Preserving and Manufacturing Agricultural Crops

APMAC

**Establishment :**

1999

**Location :**

Al-Minya Province – Egypt.

**Shareholders :**

Authorized capital is EGP 150 Million and shareholders are:

**Required Finance:**

- Required Finance: 20 Million Egyptian pound

**Investment Opportunities:**

- Strategic partnership with a specialized company in order to utilize the unused capacity.
- To expand the company activities, and to export its products to the targeted markets.
- ~~REDOUWLEISDWELQEPSSOHWLQWKEHMERQGSURKXEWLRODLOEFDLROVMRBDWRBUDLOEHI~~

**Main Activities:**

- Drying , preserving , processing and packaging of agricultural produce in addition to manufacturing of medical derivatives and medicines, processing and packaging of shrubs tea and other medical and food supplements .

**Production Capacity :**

- 4,250 tons/year.

**Future Investment Plan :**

- A consultant for restructuring and rehabilitating the company prepared a study. It includes an operational plan to exploit the full available capacity and complete the second production line.

## ODDGDOKRXXERXERPSD□

### Establishment :

1999.

### Location :

Casablanca .

### Shareholders :

Paid up capital is MAD 91 Million and Shareholders are:

### Main Activities:

- ODDGDOKRXXERXERPSD□

### Production Capacity :

- A modern mill with a capacity of 90,000 tons/year.
- 12 grain silos with a capacity of 34 000 tons/year each.
- A Power station with a 1600 KAV .

### Investment Opportunities:

- To operate and utilize the new silos to import wheat directly with the possibility for renting to others.
- Utilize available unused capacity.

**Establishment :**

2016

**Location :**

Meknes State

**Shareholders :**

Paid up capital is MAD 91 Million and Shareholders are:

**Main Activities:**

- Fruits and vegetable processing and manufacturing of fruits concentrate, juices and jam for local and export markets.

**Production Capacity :**

- 50,000 tonnes /year

**Future Investment Plan:**

- The total project investment cost is estimated according to a consultant study at MAD 209 Million (about USD 21.5 million).

**Financial Indicators:**

- 
- IRR: 47%
- Payback period: 7 years

**Required Finance:**

- MAD 110 Million

**Investment Opportunities:**

- Participation in equity to implement the full project components.
- 

**Location :**

Agareb area, about 25 km to the South of Sfax, Southern Tunisia

**Shareholders :**

8DCKKSEDSLWDOCMZIIIOOLRQDQGMKROBKROGEMDDBI

**Main Activities:**

- WUDEW/RQBILQWBPBOLYBUBMIGBMDQGLQW/KBSURGXEW/RQBIMRDSQGSBQBGYBUB  
table oils.

**Production Capacity :**

- 5HQDQIQMRRQYBRLQVHDQ

**Investment Opportunities:**

- Participation in expanding the project capacity.

## Tunisia Aquaculture Fund

### Establishment :

2017

### Location :

Tunis

### Shareholders :

SWK/ROU/EGEDSLW/DOLM/ OOLRQ/QGUKDUBKROGHOMDUBI

### Main Activities:

- Holding shares in small and medium-sized enterprises engaged in aquaculture (feed SURGXEW/RQDDUM/SURGXEW/RQKKEUBHG/QJQJQGP/UBW/QJQJQGP/QQW/DUBHW/QJQKQ/MOEW/KHODLGGOE/MW/QGTRQW/KSULEDD/SHJLRQ)
- Investing in a portfolio that contain about 15 small and medium-sized enterprises in DTXDEXOW/XUBMBEW/RUZW/KDQYHODJBRIM/OOLRQ8/OOLRQI

### The Fund Feasibility Study:

- The total investment cost of the projects in which the fund is investing is about 7/OOLRQ8/OOLRQI/QGUMERQW/UEXW/RQIMBWL/PDWBGDW/7 Million (USD 21.7 million).
- **Financial Indicators:**
  - IRR 15%
  - Principal plus interest 9% per year.
  - Carried interest 20%

### Investment Opportunities:

- Contribute in the fund's capital.

## Arabiska Fruits Project - (Under Establishment)

### Location :

Khelidia – Ben Arous State.

### Shareholders :

⚠️ This information is redacted.

### Main Activities:

- To collect, package, process and market fruits and juices for both local and export markets.

### Production Capacity :

⚠️ This information is redacted.

### The Project Feasibility Study:

⚠️ This information is redacted.

### Financial Indicators:

IRR : 36%  
Payback period : 6 years

### Required Finance:

Capital structure of the project is 50% Equity and 50% Loan.

### Investment Opportunities:

- Participation in equity.

## Agricultural Services Company (Rosso)

### Establishment :

IR :

### Location :

Rosso- in 3200 hectares in Dar Albarak – Lbrakenh Region

### Shareholders :

Paid up capital is USD 4.24 Million and shareholders are:

### Main Activities:

1. Integrated Agricultural Services.
2. Rehabilitation of land.
3. Rental of heavy machinery and agricultural equipment.
4. Production of various agricultural crops and vegetables.
5. Provision of harvesting services.
6. Provision of inputs for agricultural production (fertilizers, pesticides and plants).

### Production Capacities:

1. Cultivation of 300 hectares of fruit trees (mango, pomegranate and lemon).
2. Cultivation of 60 hectares of protected vegetables (tomatoes, beans, melons).
3. ~~KOWLYDWRQ: ■■EWDUHVMBHOCYHUBWDEOEMQURQMDQGSWQWBHM~~
4. Cultivation of 710 hectares of irrigated cereals (wheat and rice).
5. Cultivation of 10 hectares of potato seeds and 350 seeds of rice.
6. ~~KOWLYDWRQ: ■■EWDUHVMBHOCYHUBWDEOEMQURQMDQGSWQWBHM~~
7. Production of 110 hectares Alfalfa feed.
8. 30-hectare testing station for breeding experiments of value-added plant varieties

### The Project Feasibility Study:

- Investment cost estimated at USD 52 Million (Implementation assumption in 3 stages).

#### Financial Indicators:

~~WSD/DOX:EK ■■■OLR:■~~  
~~WSD/DOX:EK ■■■OLR:■~~  
~~WSD/DOX:EK ■■■OLR:■~~

#### Required Finance:

- About USD 67 million.

### Investment Opportunities:

- Participation in the company capital to expand its activity.
- Participate or contribute to the agricultural project in Dar Albarak – Lbrakenh Region that includes a range of agricultural crops.

## Arab Mauritanian Company for Poultry Production

### Location :

Wadi Alnaka located 56km from the Capital.

### Shareholders :

Authorized capital is MRO 6.1 Billion and shareholders are

### Main Activities:

- Poultry meat and table eggs production.

### Production Capacities:

- 3.95 Million hatchable eggs/ per year.
- 3 Million birds/year (about 3.6 thousand tonnes of poultry meat).
- Feed processing plant of 10.6 tons/hour.
- 3.2 Million day old chicks /year.
- 11.5 Million table eggs/year.

### The Project Feasibility Study:

- The total investment costs of the project estimated at MRO 12.06 Billion (USD 33.51 Million), Equity estimated at MRO 6.1 Billion and short-term loans at MRO 5.9 Billion.

### Financial Indicators:

The project's IRR is 18.7% and estimated payback period is 6 years and 7 months.

### Investment Opportunities:

- Participation in equity.
- Providing loans for the project

## Red Meat Production and Marketing Project:

### Location :

TRNDNFRWW

### Shareholders :

Authorized capital is MRO 6.5 Billion and shareholders are:

AAAID

Ainina Ould Eyih  
group

Zine El Abidine Ould  
Cheikh Ahmed Group

### Main Activities:

- Production, processing and marketing of red meat both externally and internally.

### Production Capacities:

- Production of about 10.7 thousand tons of red meat

### The Project Feasibility Study:

- The investment cost estimated at USD 9.83 Million.

- **Financial Indicators:**

IRR : 24.1%

3DEDHSHURDUDUQWKM

Average annual return: USD 3.56 Million.

- **Required Finance:**

About USD 4.9 Million in loans.

### Investment Opportunities:

- Participation in equity.
- Providing loans for the project.

## Veterinary Vaccine and Serum Production Project Sultanate of Oman

### Project Objectives :

- Reduce dependency on imported veterinary vaccines required.
- Ensure Supply of effective vaccines through production of vaccines from locally isolated pathogenic strains.

### Project Rationale :

- High demand for bacterial and viral vaccines for common veterinary diseases in the Arab region.
- Limited access vaccines and serum production facilities in the region that meet the needs for growing poultry and livestock production.

### Project Location :

- The project will be established in Sultanate of Oman.

### Project Products :

- Production of inactivated and live attenuated vaccines.

### Project Components :

1. Inactivated vaccines production line/facilities
2. Live attenuated vaccine production line/facilities
3. Animals experiment lab unit
4. Quality control, research and development unit
5. Service and administrative facilities units

### Project Shareholders :

- Arab Authority for Agricultural Investment and Development (AAID)
- Omani Food Investment Holding Company (OFIC)
- Technology Transfer and knowledge Providers/Partner
- Others

### Current Project Status :

- positive indicators
- and positive response was received.

## Red Meat Production Project – Algeria

### Project Objectives :

- Production of high quality chilled and frozen red meat of international standards to contribute to reduce the red meat gap in Algeria.

### Project Rationale :

- Obsolescence of existing slaughterhouse in Algeria, 80% were established in 70's.
- Continuous increase of meat consumption level (9.7 Kg in 2007 to 12.4 Kg in 2015) despite the increase in prices.

### Project Components :

- Fattening Unit
- Slaughtering unit,
- Quality control and Lab Unit.

### Investment Cost :

- The expected investment cost is USD 40 Million.

### Current Project Status :

- AAAID is looking for interested and experienced investors (from the private sectors) to prepare the feasibility studies and to implement the project.

## Dairy Production Project – Kuwait

### Project Objectives :

- Establishment of a dairy processing plant and dairy farm unit to supply the plant with milk. It is expected also to collect additional raw milk from other dairy farms.

### Project Rationale :

- 5BQXEFPL0BORGXEW MIDSDQGW RDEKLBHMHOMXELBHQDQDUSURGXEW MQMNDLW
- /LPLWAGCDLUSUREBVMQUSDDQWMTQXPEHUMDQGEDSEFLWELM

- ZKEMHUQPEQWMSSEBOWMBOOLYEMWREBORGXEWLROBRYMGLQJMRPHQEFQWLYEM

### Project Components :

- The estimated project capacity is 100 tons / day of UHT and pasteurized milk, cream and yoghurt.

### Investment Cost :

- The Investment cost is expected to be KWD 12.8 million (USD 44.8 million).

### Potential Shareholders :

- AAAID.
- Gulf Investment Corporation.
- Rawabi Holding Co.
- Others.

### Current Project Status :

- Communications between AAAID and Government to obtain project's land is **ROURLOUQGERQXOWDQHPWRBUBSDUHWKBSORMHEWMIHOMLELOMWSXCI**
- AAAID is looking for interested and experienced investors (form the private sectors) to prepare the feasibility studies and to implement the project.

## Hydroponic Project – Kingdom of Saudi Arabia

### Project Objectives :

- Production of 2.5 thousand Tons of vegetables per year in Phase I and to expand the project area to 200 ha. In phase II.
- Contribute to reduce the gap in vegetables in Saudi Arabia.
- Raise productivity in a well-controlled environment throughout the year, with high-quality

### Project Rationale :

- Continuous depletion of water reserve and the misuse of irrigation water, fertilizers and pesticides.

### Project Components :

- (10) Ten greenhouses with area of 1 ha each equipped with an air-cooling system.
- Fertilization system (reservoirs, equipment and pumps), water treatment unit, and a spray irrigation
- Packing and Packaging line.

### Current Project Status :

- AAAID is looking for interested and experienced investors (form the private sectors) to prepare the feasibility studies and to implement the project.

## Dairy Collection and Processing Project – Mauritania

### Project Objectives :

- Establishment of a Dairy processing plant for the production of high-quality UHT and pasteurized milk, yoghurt and butter, in accordance with international standards.
- Milk Collection and processing using refrigerated storage and transport technologies,
- Improve the livelihood of small farmers/herders and encourage them to increase production.

### Project Rationale :

- Unutilized surplus of fresh milk produced and improper use of hygienic methods in the milk produced.
- Interest of the Mauritanian government and support for the development of the dairy industry.
- High level of Imports of Dairy products in Mauritania.

### Project location :

- [REDACTED]

### Project Capacity

- The estimated project production capacity is 10,000 tons per year.

### Project Components :

- Two milk collection centers, with the capacity of 15,000 liters/day.
- Sterilization line (UHT line).
- Pasteurization and tetra-pack packaging line
- Yoghurt processing line
- Butter production and processing line.

### Current Project Status :

- AAAID is looking for interested and experienced investors (form the private sectors) to update the feasibility studies and to implement the project.

# Abu Hamad Grain and Fodder Crops Production Project – Sudan

### Project Objectives :

- Production of grain (Wheat, Maize and groundnuts) and fodder crops to contribute to food security in the Arab countries.

### Project location :

- [REDACTED] of Khartoum.

### Potential Shareholders :

- AAAID.
- Private-sector investors.

### Project Area :

- [REDACTED]

### Proposed Company Type :

- Establishment of Limited Liability Company with interested investors shareholders.

### Project Irrigation :

- [REDACTED] distance of 6 km from the project site.

### Current Project Status :

- AAAID is looking for interested and experienced investors (form the private sectors) to prepare the feasibility studies and to implement the project.

## Grain and Fodder Crops Production Project – Egypt

### Project Objectives :

- Production of grain (Maize, Soybean and Wheat) and fodder crops to meet the requirement of the poultry and livestock production industry in Arab countries and contribute to food security.

### Project location :

- The project is proposed to be located in East Owinat area based on available required agricultural resources.

### Potential Shareholders :

- AAAID.
- Private-sector investors.

### Project Area requirements

- 50,000 Feddan Arable land.

### Proposed Company Type :

- Establishment of Limited Liability Company with interested investors/shareholders.

### Project Irrigation :

- The project will be irrigated by borehole wells.

### Current Project Status :

- Land allocation is under process with Egyptian authorities.
- AAAID is looking for interested and experienced investors (from the private sectors) to prepare the feasibility studies and to implement the project

## Grain and Fodder Crops Production Project –Mauritania

### Project Objectives :

- Production of grain (Maize, Soybean and Wheat) and fodder crops to meet the requirement of the poultry and livestock production industry in Arab countries to contribute to food security.

### Project location :

- 

### Potential Shareholders :

- AAAID.
- Private-sector investors.

### Project total Area

- 45,000 of Arable land.

### Proposed Company Type :

- Establishment of Limited Liability Company with interested investors and shareholders.

### Project Irrigation :

- The project will be irrigated from the Senegal River and/or borehole wells.

### Current Project Status :

- Land allocation under process. AAAID is looking for interested and experienced investors (from the private sectors) to prepare the feasibility studies and to implement the project.

## Sheep Meat Production, Processing and Marketing Project in Eastern Region – Morocco

### Project Objectives :

- Establishment of investment project with development dimension in order to enhance Livestock sector in the region.
- Establishment of collection and fattening centers in the region.
- Development of the livestock industry.
- Linking herders with production and manufacturing chain.
- Build up modern slaughterhouse to produce high quality red meat according to proper quality standards.

### Project Rationale :

- **TEMPERATURE AND CLIMATE**
- Livestock concentration in the east region 0.7 million head
- Concentration of herders in the east region.
- Lack of modern slaughterhouse in the region.

### Project location :

- The project proposed to be located in "Ain Beni Mathar" 65 Km South Ouejda city.

### Project Components :

- Fattening unit, Fodder unit, feed concentrate unit, red meat processing unit, and by-products unit and civil work.

### Investment Cost :

- The expected investment cost is USD 28 million.

### Current Project Status :

- The AAAID is looking for interested investors to join the project after updating of the required studies.

## Assoki Sugar Processing Plant Project - Sudan

### Project Idea :

- To Use the land own by the farmers at Sinnar District, with the existing infrastructures such as irrigation canals and water rumps, rehabilitate it for the purpose of production of white Sugar, ethanol and electricity.

### Project Objectives :

The project aims to use the land owned by the farmers at Sinnar District, with the existing infrastructures such as irrigation canals and water rumps, to rehabilitate it for the purpose of production of :

- 1.2 million tons of sugar cane per year.
- 127 k tons of refined sugar.
- 13.2 k liter of ethanol.
- 34.6 MW electricity.

### Project Rationale :

- To contribute to the increasing needs of sugar in Sudan.
- Existence of an agricultural project that suits sugar cane production.
- Contribute to the needs of electricity within the project area.

### Project location :

- The project proposed to be located in Sinnar state, Assoki district in an area of 56 k feddan.

### Investment Cost :

- The Investment cost is expected to be USD 530 million.

### Current Project Status :

- Assoki Co. and Assoki Farmer union have signed an agreement for contract farming relationship. The Feasibility study is under process for updating.

## Silage Production Project - Sudan.

### Project Objectives :

- The project aims cultivate 10 K Feddan of maize in two seasons (summer and winter) for the production 250 K tons of silage fodder annually.
- and increase the added value of meat and milk production.

### Project Rationale :

- High cost of imported silage (USD 20 million).
- AAAID Successful experiments of silage production and for other companies.

### Project Site :

- integrated Project.

### Investment Cost :

- The Investment cost is expected to be USD 11.3 million.

### Current Project Status :

- The feasibility study is completed and the project is at the promotion stage.

6\$1\$% (W0D0Q0G0R0G0H0O0R0S0M0O0R0G0X0E0W0R0Q0X0\$0U0H0D0

**Project Objectives :**

- W0D0Q0G0R0G0H0O0R0S0M0O0R0G0X0E0W0R0Q0X0\$0U0H0D0 gap reduce imports and enhance food security in Algeria.

**Project Rationale :**

- Reduce the need to import cereal crops.
- Availability of vast and fertile arable land in Algeria.

**Project location :**

- The project is proposed to be located in Tiaret State of an area of 10,000 Ha.

**Potential Shareholders :**

- AAAID.
- Private-sector investors.

**Current Project Status :**

- AAAID is currently in contact with Algerian authorities concerning the allocation of the required lands.
